¹ Excluding unusual items

NZ Concrete

- Volume declines in cement, aggregates, readymix, masonry and concrete pipe.
- Reflects weaker residential & commercial construction markets only partly offset by infrastructure activity.

Australia Concrete

- Good volume growth in quarry volumes and non-pipe concrete products.

Construction

- Strong growth in infrastructure work, commercial activity weaker.
- Backlog \$1.2 billion

Laminates & Panels result

NZ\$m	Jun 09 12mths	Jun 08 12mths	% Δ
Sales	2,052	1,857	+11

¹ Excluding unusual items

Laminex

- Volumes down in NZ and Australia, export markets weak.
- Significant input cost increases in first half

Formica

- Strong performance in Asia. US and European markets significantly weaker.
- Prices remained firm and input cost pressures eased in second half.

Formica growth in Asia and North America turnaround boosted result, but Europe weak

EBITDA NZ\$m¹	2H09	1H09	2H08	1H08
Asia	19	20	14	16
North America	17	2	-17	10
Europe	8	9	30	22

Reported EBITDA (NZ\$)	35	25	10	38

¹ Before unusual items

Steel result

NZ\$m	Jun 09 12mths	Jun 08 12mths	% Δ
Sales	1,321	1,279	+3
EBITDA ¹	175	123	+42
EBIT ¹	154	101	+52
Funds Employed	562	589	-5
ROFE %	27.4	17.1	

- Strong result in first half reflected high steel prices and strong demand.
- Second half sales 30% lower than first half.
- Continued strong demand from infrastructure-related projects.
- Rollforming volumes lower due to weaker residential and light commercial markets.

¹ Excluding unusual items

Health and safety

Current operating climate

- No significant pick up in activity across the group
- Overall volumes are generally stable except for:
 - insulation in Australia and New Zealand
 - international markets for metal roof tiles
- Commercial building recovery will require improvement in broader economy and increased bank capacity
- Increased infrastructure spending by government continues to be a positive factor
- Cautious about the immediate outlook and timing/pace of a recovery

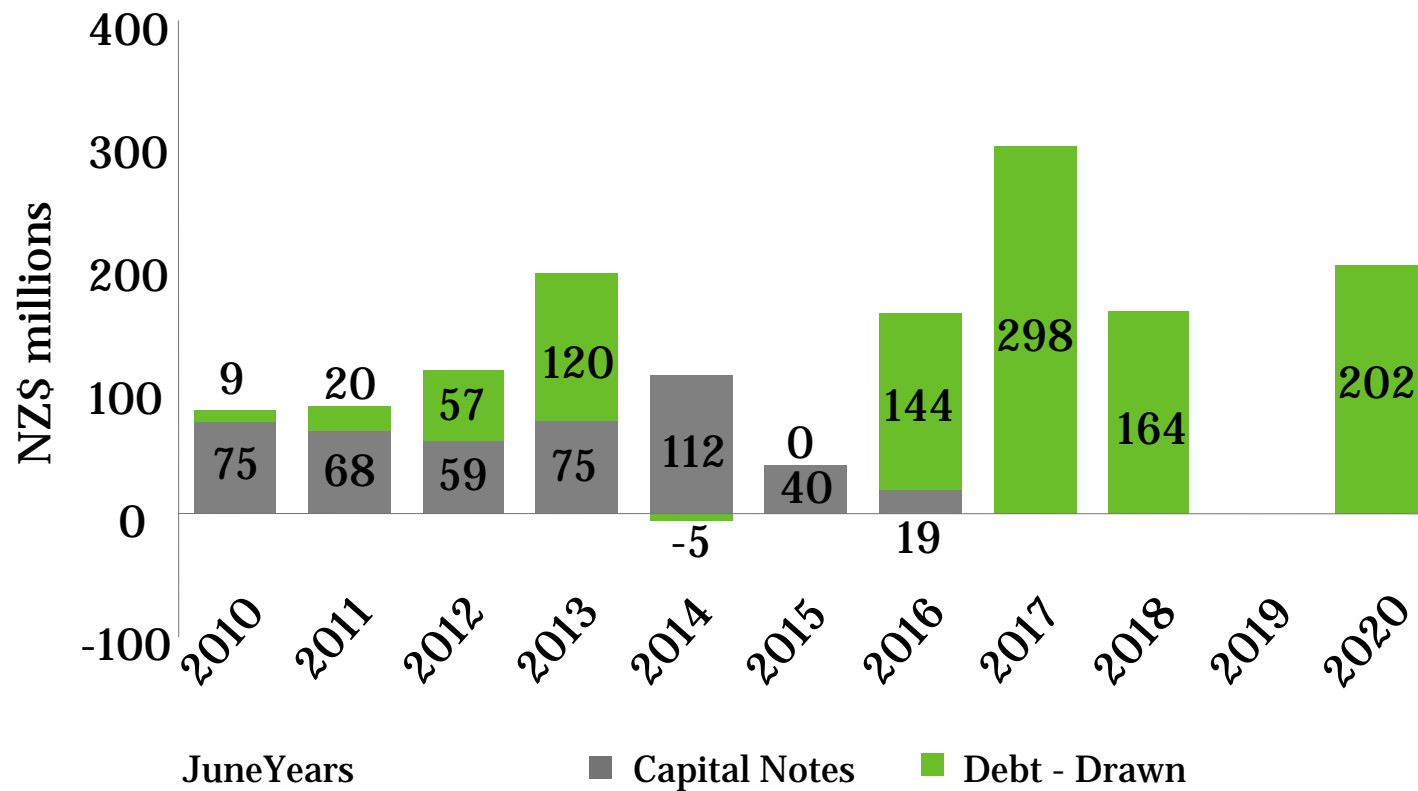

Positioned for the future

No significant debt refinancing until 2013

Strategy

Longer term strategy continues to be:

- improve earnings reliability
- maintain and improve internal capabilities
- pursue acquisition opportunities where these meet key investment criteria

Our aspirations by geography:

New Zealand Maintain and extend domestic businesses, strengthen channels to market.

Australia Create the leading Australasian building products and construction materials business by establishing strong market positions.

International Develop existing operations into the world's leading laminates and panels business.

Dr Roderick Deane Chairman

Market outlook 2010

- Subdued outlook for FY10 with low activity levels expected in most markets.
- Infrastructure spending in NZ and Australia will assist construction, concrete and steel businesses.
- Weak residential and commercial building activity will impact results; Insulation will benefit from government stimulus package.
- Asia expected to continue growth overall, Europe expected to remain weak, North American volumes expected to be stable at low levels.
- Continued focus on achieving operational efficiencies and cost control given lower volumes.

Performance outlook

- Current range of analysts' forecast net earnings excluding unusual items for FY 2010 is NZ\$261 million to \$340 million
- Based on current trading performance net earnings should fall within this range provided no further deterioration in key markets
- Without a sustained recovery in volumes, earnings will likely be at the lower end of the range
- Current intention is to maintain the dividend at 14.0 cents per share for each half year. Final decision dependent on financial outcome for the year
